I checked my vm, too. Nothing from her, but guess what I have on tape, a 2:30 call from Jim Magill telling me yet again that he updated his story and it should be corrected as of nine hrs ago. Saved.
Is his outfit part of platts? Wondering if it is separate whether he updated it on his end but Platts never pulled the updated story?
Dave, do you want to warn Jim about this one?
Maybe she called region?

Subject: EPA Pavillion statement
Hi, Jenifer,

I work in the press office at EPA HQ and handle fracking.

I noticed your story said that you did not receive a response today and I apologize. I didn't receive an email or a call from the chron today. Feel free to call or email me on Pavillion or any fracking issue. 202.564.0496.

Following is our statement, attributable to EPA and I hope you can use it to update your story.

Thanks!

EPA has released new monitoring data as part of the agency's ongoing analysis of ground water quality in the Pavillion, Wyoming area. These data were collected in collaboration with the United States Geological Survey (USGS), which conducted its own sampling at one of the wells. USGS data were released earlier. EPA's new data and the USGS data are generally consistent with the monitoring data included in EPA's December 2011 Draft Report on Pavillion Area Ground Water Investigation. The data, along with EPA's draft report and USGS data, will be submitted to an independent expert peer review panel. EPA will also take public comment on its data and will be extending the comment period to January 15, 2013 to give stakeholders sufficient time to consider all data related to the Pavillion, Wyoming groundwater investigation.
